

# IMPACT BRIEF

## CLIENT:

### Center for Autism

Philadelphia, PA

## DESCRIPTION:

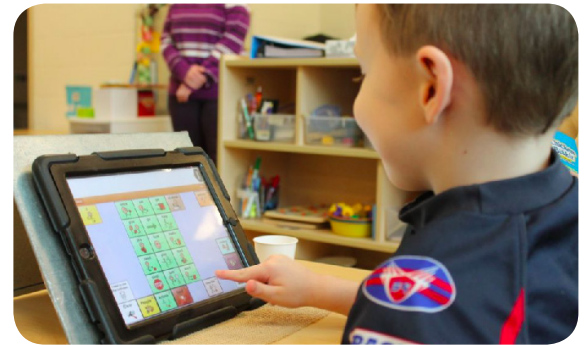

The Center for Autism is a non-profit organization founded in 1955 by renowned child psychiatrist Dr. Bertram A. Rutenberg and is the oldest autism treatment center in the nation. A leading provider of services in the Northeast region, the Center for Autism has two locations serving Philadelphia and the surrounding counties. The locations provide evaluation and assessment services and comprehensive treatment programs for individuals and families affected by autism.

## CLIENT NEEDS:

The Center for Autism wanted to leverage mobile technology as a way to distribute learning support resources to its clients. Cost was an issue as they did not have the budget to engage properly certified mobility experts to achieve their goals.

## SOLUTION & IMPACTS:

iBusiness Technologies provided its mobility expertise and deployment services at no charge in partnership with Apple. iBusiness Technologies created the Mobile Device Management platform, distributed apps, learning support resources and trained the administration staff from the Center for Autism to implement the devices throughout the system. iPads are now being used by autistic students as a tool to advance their education and treatment programs. The intuitive and familiar iPad interface made for a quick and seamless rollout. Students love using the iPads and the Center for Autism staff appreciates the ease with which they can provide their clients with new and interactive resources. This entire project, performed by iBusiness Technologies at no cost, was an extraordinarily gratifying experience for the iBusiness Technologies team. The system will deliver years of impactful special needs support to many students.

## SOLUTION SUMMARY:

**PRODUCT & SERVICE MIX:**  
30 iPads
